TAMAR LAKE Inc. BARRAGE PROPOSAL AT ROWELLA

Dear Robin,

Thank you for your response received of 17^{th} September in response to our summary of concerns raised at the meeting of 10^{th} August.

Everyone involved is pleased that our concerns have been recognised and welcome the assurance that they will be taken into account in future assessment of the proposal.

In terms of mitigating the impact of the structure on our community, the Long Reach location is generally agreed to be the least problematic. Support for the green option would however be qualified until all other aspects such as the location and standard of the road and other possible issues have been resolved. Support or otherwise of the overall concept remains the prerogative of each individual concerned.

However it must be stressed that the red option from West Bay Road would be vigorously resisted. Concern has been expressed that the revised Vision and Strategy Statement still seems to suggest the latter as the preferred option which may influence prospective purchasers of property in the locality. It has been suggested superimposing the image of the barrage at all three locations on page 6 would overcome this.

We will now await the results of the modelling and future developments with interest, when there will surely be bridges to be crossed, and hopefully not burned, when we come to them.

Thanks again

Yours faithfully.
